THREE INDIANA SUICIDES

Wife Quarrels With Her Paramour and Shoots Herself.

A Prominent Doctor of Harrodsburg and an Old Resident of Elkhart Slay Themselves.

KOKOMO, Ind., Feb. 6.—Mrs. I. F. Smith, of this city committed suicide yesterday by shooting herself through the breast. Despondency, caused by a quarrel with a man with whom she was infatuated, it is said, caused the act. Her last rational words to her husband were: "They made me do this; it is not your fault." The coroner will investigate thoroughly. Her husband never suspected her of infidelity until her dying confession. Smith was mail agent under Cleveland and is now traveling agent for the Banner of Right and Freedom, the State Liquor League organ.

HARRODSBURG, Ind., Feb. 6.—The little town of Harrodsburg, twelve miles south of Bloomington, was thrown into excitement yesterday afternoon by the suicide of Dr. C. D. McLahlan, a leading citizen. He was found dead in a factory, with a strap about his neck. Despondency was the cause. He was a leading physician of the county, and a well known republican, an ex-soldier, and was about forty-six years old.

ELKHART, Ind., Feb. 6.—Dudley Davlson, aged about sixty years, an old and prominently known resident of this city, was found hanging in his residence yesterday, having committed suicide. Ill health was the cause.

WILL THEY NEVER END?

And Now It is a Trust of Railroad Coal Mines.

Which Will be Gigantic in Its Scope—One Hundred Mines Will Go Into the Combine.

PITTSBURG, Feb. 6.—A combination of all the railroad mines in Western Pennsylvania, to be known as the Western Pennsylvania Coal company, is forming. Plans are almost completed and there is now fully $15,000,000 from 100 operators in the pool. Three meetings of the operators have been held and another has been called. The idea is to establish uniform prices and curtail expenses. The combination includes all the mines on the Pittsburg, Virginia and Charleston, Baltimore and Ohio, Pittsburg, McKeesport and Youghiogheny, Pittsburg and Bellevernon, Pittsburg, Chartiers and Youghiogheny, Chartiers Valley, Moon Run, Montour Run and the Panhandle roads. Of these different roads there are not less than one hundred different mines, all of which are expected to come into the combine. The majority of these have already done so. The originators of this gigantic scheme deny that the object of the combination is to enter into competition with the Hocking Valley pool.

KANSAS DEMOCRATS.

The Stalwarts Will Fight Against Fusion in That State.

KANSAS CITY, Mo., Feb. 6.—At a meeting of stalwart democrats, held in the Midland hotel, in this city, yesterday, steps were taken for pushing the fight against fusion in Kansas. The meeting was attended by the members of the stalwart democracy committee and prominent party men from all parts of the state. A call was issued for a meeting of the state central committee at Topeka February 18 and invitations will be extended to democrats throughout the state to be present and participate in the deliberations. The movement has gained strength since the combination of the anti-republican forces in the election of Senator John Martin and will undoubtedly result in a straight democratic ticket being put up two years hence.

BAD BOOMER.

He Stole Hay and Then Stabbed Two Men.

TOPEKA, Kansas, Feb. 6.—For several days a band of traveling boomers, presumably headed for the Cherokee lands, have been camped in this city. Since the boomers have been camped here Liveryman Powers has been missing hay from his stable. He suspected the boomers. Last evening Powers, accompanied by his son William, fifteen years of age, met one of the boomers coming toward the camp on horseback. Powers and his son each the stranger and, taking the horse by the bridle, accused the man of stealing the hay. The boomer, with a motion quick as a flash, pulled out a dirk and reaching over to Powers cut him from ear to ear. The boomer then attacked William with the knife, inflicting fatal wounds in both cases.

A BAD WRECK.

Engine Thrown Into a Creek and Two Men Missing.

CUMBERLAND, Md., Jan. 6.—About 2 o'clock this morning freight train No. 74 on the Pittsburg division of the Baltimore and Ohio railroad ran into the rear of an extra freight at Williams, Pa., wrecking several freight cars. The engine was thrown into a creek. Engineer Wallace and Conductor Mez are missing. Conductor Dunlap and Flagman Grimes, of the extra train, were slightly hurt and Fireman Noland, of the regular train, was seriously injured. Trains between Cumberland and Pittsburg are being run via Grafton and Wheeling.

CITY OF PEKIN.

The Steamer Sighted Eighteen Miles Out.

SAN FRANCISCO, Feb. 6—The steamer City of Pekin was sighted eighteen miles out at 8:45 this morning. The long overdue vessel is being towed by a tug. The steamer San Juan, which was yesterday sent in search of the Peking, is not in sight.

DEMOCRATIC RULE.

Taxes Will be Sliced Down in the Hoosier State.

The Legislative Committee Finds Nothing Wrong About the Evansville Insane Hospital.

INDIANAPOLIS, Feb. 6.—The ways and means committee of the general assembly has progressed so far in the consideration of the financial condition as to practically agree upon a report recommending a reduction of two cents on the levy for general state purposes, leaving it at sixteen cents on the $100 and a reduction of five cents at least for the school fund. Besides this, four cents of the eighteen cent levy will be transferred to the sinking fund for payment of the state debt.

The legislative committee sent to Evansville to investigate the southern hospital for the insane ended its work at 5 o'clock Saturday evening, and returned to Indianapolis. It found the charges of malfeasance and cruelty unsupported. The numerous witnesses were unable to give any testimony but hearsay. A mild sensation was produced when Joseph M. Terry, who seems to be the leader in the movement, testified that James T. Walker, the board's attorney, had informed him that if he presented the memorial he would be prosecuted for libel. Mr. Walker explained his position satisfactorily. The committee will make a unanimous report that there is nothing in the charges.

WABASH ELOPERS.

A Banker's Son and Farmer's Daughter Wed at Chicago.

WABASH, Ind., Feb. 6.—The elopement of Bay Talmage, son of John Athen Talmage, vice-president of the First National bank, and Miss Inez Miller, a pretty and highly respected young lady, daughter of a farmer south of this city, is announced. Yesterday Miss Miller came to this city and, meeting Talmage, they went to Chicago to be married. They took but little money with them. It is said that the pair have been infatuated with each other for some time and that the parents objected to the marriage. Talmage is twenty-four years of age and the young lady twenty. Relatives have heard nothing from the couple, who are expected to return home to-morrow.

A HUMAN FOOT.

Found in a Garbage Barrel by Mr. Scheie's Men.

A gang of garbage gatherers were terribly shocked this morning by finding a human foot in a garbage barrel back of Hope hospital. They were about to dump the contents of the barrel into their wagon when one of the men discovered the foot, and he nearly fainted in fright. Garbage Master Scheie was notified and he in turn notified the hospital authorities, who had the objectionable piece removed and given decent burial. The foot formerly belonged to Frederick Paul, the man injured in the Pennsylvania yards last Saturday. It is not customary to dispose of amputated limbs in this manner and the hospital authorities cannot account for the presence of the foot in the garbage barrel.

LOCAL LINES.

The Morton club holds a regular monthly meeting this evening.

J. D. Featherford and wife, of Kendallville, spent Sunday in this city at the Wayne.

Mr. Frank McKennie, of Pittsburg, Pa., is the guest of his brother, W. H. McKennie, at the Wayne hotel.

D. L. Crawford, an old soldier from Muscatine, Iowa, is in the city at the Wayne and this morning called upon his old friend U. L. Pettit of the First National bank.

The Fort Wayne Cycling club will hold its regular monthly meeting tomorrow evening and discuss the coming L. A. W. meeting, which comes off in this city next July.

Shortly after 1 o'clock this afternoon the patrol wagon was called to No. 140 West Third street, Bloomingdale, where a drunken man named Sullivan was wading around in the water and creating a disturbance. The fellow had just been released from the county jail.

This afternoon a number of witnesses left for Indianapolis to be present at the trial of the Leininger gang of counterfeiters, which comes up before the federal grand jury tomorrow. The witnesses, five in number, are as follows: A. J. Miner, Henry Trubenback, B. L. Post, Herman Krotz and T. W. Seabold.

The congregation of the Evangelical Church of the Redeemer at a meeting yesterday elected William Speigel, R. C. Rinewald and Theodore Kueher as trustees, and William Speigel treasurer. This church was organized two weeks ago and starts out under favorable auspices. It is in the German Lutheran Synod of Missouri, and will receive aid, if necessary, from that source.

This morning Mrs. Helland, who resides at No. 322 Creighton avenue, put a big roast on her stove and went out of the house for a few moments. During her absence the roast boiled dry and great columns of smoke were soon pouring out of the windows. Neighbors, thinking the house on fire, turned in the alarm from box 49. The department made the run and soon discovered the cause.

The Old Soldiers' club will give a ball at Schroeder's hall on Broadway, tomorrow night.

CATHOLIC CIRCLES.

Cardinal Gibbons' Letter the Topic of Conversation.

The American Archbishops Said to Have Adopted a Protest Against Mgr. Satolli.

NEW YORK, Feb. 6.—The letter purporting to have been written by Cardinal Gibbons, of Baltimore, to the American archbishops asking whether their alleged protest against Mgr. Satolli shall be presented to the Pope at this late day, is the chief topic of conversation in Catholic circles. The Chicago dispatch containing the letter charged that the alleged protest, said to have been adopted by the archbishops at their meeting last November, had been withheld for six weeks until after Satolli's powers had been broadened by the pope, so his holiness might not know of the opposition to the apostolic delegate among archbishops. Archbishop Corrigan has refused to see reporters, but his private secretary, the Rev. Father Connelly, has made the following statement for him:

"It was the archbishop himself who called my attention to the story and after reading the letter alleged to have been written by Cardinal Gibbons, said that he considered it a most unjust, unwarranted and unfair attack upon his eminence at Baltimore. In fact, he directed me to say that he could not speak too strongly upon the subject.' I do not know whether Archbishop Corrigan has received a letter from Cardinal Gibbons, such as was printed or not. He might have received one in his own correspondence and I should have known nothing of it. I have never heard of the letter until I read the newspapers."

TWO PRIZE FIGHTS.

Tansey Knocked Out by a Canadian—Sharpe and Crosby.

CHICAGO, Feb. 6.—Joe Tansey, the southern middleweight, and Dick Guthorie, of Montreal, middleweight champion of Canada, fought eleven rounds in a west side resort yesterday for a small purse. Tansey made things lively in the first few rounds, but lacked staying qualities and was knocked out in the eleventh.

ST. LOUIS, Mo., Feb. 6—Harry Sharpe yesterday defeated Frank Crosby in a finish fight for a stake of $500 and the light-weight championship of Missouri in the seventy-seventh round. The battle was decided in Illinois, at a point about ten miles from this city. It was remarkable in many ways and was by all odds the best exhibition of pluck, skill and endurance that has been shown in the west, if not in this country.

JOHN HUNTINGTON'S WILL.

The Dead Millionaire Bequeathed Over $1,000,000 to Charity.

CLEVELAND, Feb. 5.—The will of the late millionaire, John Huntington, who died recently in London while on his way home, provides for the founding of an art and polytechnique school in Cleveland. Mr. Huntington bequeathed a cash endowment of $800,000 to the school and added his valuable art collections. Other provisions for the school increase the endowment of $1,500,000, the homoeopathic medical college dispensary receives $15,000, the Western reserve medical college dispensary $25,000 and the Bethel charity association $25,000. The rest of his estate goes to his wife and children. The estate is estimated as worth more than $3,000,000, more than half of which is given to education and charity.

MRS. WILLIAM C. WHITNEY DEAD.

She Passes Away at Her New York Residence Sunday Morning.

NEW YORK, Feb. 6.—Mrs. William C. Whitney died at 3 o'clock yesterday morning. She failed slowly but steadily from Saturday morning, despite all that could be done for her, and at 10 o'clock Saturday night all hope was practically abandoned. Her life was prolonged a few hours by the liberal use of oxygen, but at 3 o'clock she passed easily away, Mr. Whitney and a nurse only being present with her. Mrs. Whitney was the only daughter of Henry B. Payne, at one time senator from Ohio, and a sister of Oliver Payne, of the Standard Oil company.

SENATOR VILAS.

Governor Peck Thinks He Should Remain in the Senate.

CHICAGO, Feb. 6.—Governor Geo. W. Peck, of Wisconsin, was at the Auditorium yesterday. In regard to Senator Vilas and the cabinet, he said: "I do not think he would accept a cabinet position if it were offered him. That it has not been offered him I am certain, for I saw a dispatch from him a few days ago, in which he said he had not been asked to take such a position. I think the best place for him is in the senate and I am confident he thinks so, too."

BRICE'S WAY.

He Leases a Hotel to Entertain the Buckeyes.

MANSFIELD, Ohio, Feb. 4.—It is told here on excellent authority that Senator Calvin S. Brice has leased the Metropolitan hotel in Washington and that he will entertain there during the inauguration, free of expense, every citizen of the Buckeye state who calls upon him and establishes the fact that he is an Ohioan, regardless of his politics, race, religion or previous condition of servitude.

Against Annexation.

LONDON, Feb. 6.—The Pall Mall Gazette states that the governor of New Zealand has telegraphed to the Marquis of Ripon, secretary of state for the colonies, a strongly worded protest against the annexation of Hawaii by the United States. No definite answer has yet been returned by the imperial government to the New Zealand communication.

UGLY NEGROES.

Bent on Lynching an Innocent Man in Texas.

The Timely Arrival of a Sheriff's Posse Prevents It—The Whites Now Guarding the Town.

STAFFORDS POINT, Texas, Feb. 6.—Yesterday morning a half-grown negro boy offered a gross insult to Mrs. Dr. Cochrane. She reported the matter to her husband on his return and the doctor chastised the boy. Last night, while at the railway station, Clinton Edwards, the boy's father, met Dr. Cochrane, who is a consumptive man, and after a wordy quarrel the negro picked up a stone, with which he felled the doctor to the earth. As he fell Dr. Cochrane seized his pistol and put three bullets into Edwards, killing him instantly. Wm. Watts, station agent of the Southern Pacific railroad, disarmed Cochrane, and then a number of negroes assaulted him. They accused him of having assaulted Edwards and demanded his life. Dr. Cochrane told the excited crowd he was the guilty party, but the mob was bent on lynching Watts. Watts managed to reach the inside of the depot, which he barred, and with the arms he had there and the assistance of the telegraph operator, he managed to hold the crowd at bay and in the meantime telegraphed to Richmond, Houston, Wilker and sister towns for assistance. While this was going on the negroes were also securing reinforcements and fiery leaders proposed burning the depot and the town. Just as they were about to put their designs into execution an engine pulled into the town with the sheriff and a posse of armed men. It was with difficulty the sheriff could get the crowd quiet. Dr. Cochrane surrendered, but the mob clamored for Watts, the station agent. In the hubbub the sheriff, to appease them arrested Watts and quickly getting the man to the train the posse pulled out for Richmond, where he will be held until an examination is held. The negroes are ugly and threatening and the whites are sleeping on their arms and guarding the town.

LOCAL LINES.

John Trainer, an employe of the Fort Wayne Organ company, is seriously ill.

The Sons of Columbus Reading Circle will meet at the home of Dr. E. J. McOscar tomorrow evening.

The faculty of the Fort Wayne Medical college have decided to hold the commencement exercises this year at the Masonic Temple on the evening of March 8th.

John B. Taylor writes to Postmaster Higgins from New London, Ohio, asking for information with regard to the whereabouts of one John Crosby, who was a soldier in the Eighth Indiana regiment.

On Saturday evening Mrs. Hartman, of Jesse street, fell near the Globe Chop house and dislocated her hip. She was taken to her mother's at No. 76 East Columbia street, where Dr. Rosenthal attended.

Rev. Leeper has had quite a rush of marriages lately. The last reported was Mr. James A. Coy to Miss Emma Iddings, who was married at Rev. Leeper's residence, 26 Washington street, on February 6 at 8:30 p. m.

The Indianapolis Sentinel says: "Rodabaugh is a rustler and one of the best representatives Allen has had for a number of years. He is active, alert, a good talker with an overabundance of peculiar gestures and will in time be a leader."

George Koolinger, of Adams township, fell on Lillie street, Saturday afternoon and broke the bones of his right leg near the ankle. Dr. Carl Schilling attended. The injured man was taken to the home of his brother, Louis Lepper, at No. 63 Lillie street.

Harry Collins, a compositor at the Newspaper Union, was taken suddenly ill a few days ago, at his boarding house, No. 27 East Main street, and yesterday the Typographical union and Union Veteran legion, of which organizations Mr. Collins is a member, had him conveyed to the hospital.

Rev. J. L. Leeper lectures this evening on the Yellowstone National Park and the Yosemite Valley in the Second Presbyterian church. Seventy fine views of the most wonderful scenery in this country or the world will be shown, including geysers in action, canions, waterfalls, big trees of California, etc.

S. D. Soliday and George W. Soliday, the secondhand furniture dealers, have dissolved partnership, George retiring from the business. The latter will seek employment in some other line, probably a clerkship in a clothing or dry goods store. George is well known and well liked by our citizens and who ever employs him will certainly have an increased business.

This evening Daniel McKay, manager of the Brookside farm, will address the members of the Fort Wayne Caledonian society at their hall, 76 Calhoun street, having chosen for his subject: "Curling." This is an old Scotch game which is played upon the ice in winter time and which is to this day one of the foremost of all Scotch sports. Mr. McKay is an expert player and all the members who can possibly attend should do so, as some valuable pointers in the game are promised discussion.

IN THREE HOURS.

Rate of Speed at Which One Will Soon Go to Europe.

A Gigantic Scheme Which Will Solve the Problem of Rapid Transit in Crossing the Ocean.

FORT WORTH, Texas, Feb. 6.—Fort Worth has for the secretary of her chamber of commerce an apt illustration of the adage, "The right man in the right place." He is F. M. Clarke, the secretary of the chamber, much is due for the success in placing business houses here during the last couple of years. The general is of a restless disposition, and when not engaged in presenting the attractions of the Panther City to some eastern jobber, is apt to be engrossed in the study of the sciences. He is an accomplished scholar and well posted in all the latest advances in electrical appliances. A reporter dropped into the general's office the other night and found him seated at his table before a lot of mechanical drawings.

"It can be done," said the general.

"What can be done?" asked the reporter.

"Cross the Atlantic ocean in three hours."

It was the remark of a cool business man. To say the least, the announcement was somewhat staggering. A careful examination of the general's invention, however, is extremely convincing, and all skepticism vanished with the explanation of the wonderful device. As described by the general, his invention is as follows:

"We propose to construct a long tube of prepared rubber—long enough to reach across the ocean. The first tube will have an internal diameter of twelve inches, with walls four inches thick, and in the walls will be woven a number of copper wires. This will form a flexible tube that will be easy of handling, and can be coiled away in the hold of the vessels to be engaged in laying it, or, perhaps, some special form of large barge may be built for the purpose of laying. Eminent engineers have assured me that there will be no difficulty in laying the tube.

"There will be two air pumps, one at each end of the tube; one of the pumps will force the air in, and the other will exhaust, creating a current of air that will pass through the tube at a speed of 1,000 miles per hour. It is the intention to use the first tube made for the transmission of mail matter. It can be used to transmit grain of all kinds, and also petroleum.

"The tube for passenger service will be twelve times greater than the one just described, so that it will have an internal diameter of twelve feet. It will also be slightly different in shape, being made of an elliptical form instead of being perfectly cylindrical. The shape will be for the purpose of preventing rotation of the carriages or cars, which will be about sixty feet in length. No inconvenience whatever will be experienced by passengers. The air will be abundant and pure; light will be supplied by storage batteries carried by the cars, and in case of any derangement occurring to the air pumps which furnish the motor current of air, attachment of the wires carried in the walls of the tube to a reserve dynamo on shore will at once establish an electric current in them, which can be used to operate the motor-dynamo which will be carried by each car for emergencies. Telephonic connection will be maintained at all times with every car and both ends of the tube."

"Well," said the reporter, "you have not told me what are the materials that you put into the rubber to make it harden when under the water."

"That information is the property of the stockholders of the company that will construct and operate the affair."

HARD TO KILL.

Marshal Franke Fires Seven Shots at a Dog, on Superior Street, Before He Succeeded in Killing It.

This morning Officer Franke was called to No. 25 West Superior street in great haste. The cause of alarm was a large bird dog which was running about the streets frothing at the mouth and snapping at the passers by.

The animal was supposed to be mad or suffering from the effects of poison. In some manner a short chain which was around its neck caught in the board sidewalk and no one dared go by the enraged canine. Marshal Franke aimed a deadly shot at the dog's head but did little damage. He aimed again, and thought he put a bullet through its head, as the dog fell over apparently lifeless. The marshal then went into the residence to inquire for the owner, but while he was gone the dog revived and was as lively as ever, presenting a frightful spectacle with a great hole in its skull. Officer Franke returned and put five more bullets into the poor beast before he succeeded in killing it. The dog was a valuable hunter.

The St. Louis Republic says: "T. A. Wilkinson, a detective from Fort Wayne, is at the Laclede. He goes to St. Louis for the purpose of taking Ernst Mulley, now in jail, back to Fort Wayne to answer to the charge of larceny preferred against him by the Ohio Farmers' Insurance company, by whom Mulley was employed. The young man was a "high roller" and the company discharged him, yet he kept on doing business just the same, but failed to turn over the proceeds. Detective Wilkinson will leave this morning for Jefferson City to secure the papers allowing him to remove the prisoner from the state."

A RAINY DAY'S NOTES.

Today Exceedingly Dull From a Society Standpoint.

But There is Quite a List of Entertainments to be Given This Week—Personal Paragraphs.

E. M. Rosenthal has returned from Chicago.

H. J. Meyers has returned to St. Louis, Mo.

Miss Adah Mounair entertains friends this evening.

Mrs. G. D. Crane will entertain the Pedro club this evening.

Miss Margaret Spencer, of West Wayne street is quite ill.

R. G. Nunnemaker, of Hartford City, spent Sunday in this city.

Miss Ida Cook, of 18 West Lewis street, is quite ill with measles.

S. R. Alden has returned from a short trip to Buffalo and Detroit.

Mrs. Philemon Colerick leaves in a few days for Detroit to visit friends.

F. C. Toedtman was the guest of friends in Cincinnati, Ohio, over Sunday.

G. S. Howard, of Frankfort, Ind., spent Sunday with relatives in this city.

Miss Margaret Colerick, of West Wayne street, is ill with congestion of the throat.

Miss Carrie Haiber, of Wells street, entertained a number of her friends last evening.

Miss Mary Sibray spent Sunday with her sister, Mrs. J. J. McCracken, at Columbia City.

Miss Cora Doughty was the guest of Miss Florence Fulton, at Columbia City, over Sunday.

Miss Pauline Schiemer, of 51 West Lewis street, will return to Chicago one week from Thursday.

Miss Minnie Rosenthal leaves the latter part of this week for Chicago to remain several weeks.

John Kiser, of Winters, Mich., will be the guest of Miss Emma Cook, of 48 West Lewis street, next week.

The members of the J. DeV. club are arranging to give a Valentine party on the evening of Monday, Feb. 13.

H. F. Toedtman, of Kokomo, Ind., who was the guest of his mother over Sunday, has returned to his home.

Mr. A. H. Cousens, of Saratoga Springs, N. Y., is the guest of Mr. and Mrs. T. E. Ellison, of West Wayne street.

The Y. P. S. C. E. of the Salem church will give an entertainment and supper on the evening of Thursday, Feb. 9.

The Wedding of Miss Minnie Strass, of this city, and Mr. Herman Schnayer, of Saginaw, Mich., will take place on March 1.

Dr. and Mrs. Bulson have issued invitations for a pedro party, to be given in the New Avelline parlors Monday evening.

The Wit and Wisdom club was entertained by Mrs. J. S. Heller this afternoon at her home, on West Washington street.

Mr. and Mrs. C. A. Robinson, who have been the guests Mr. and Mrs. Frank Sordlet, returned Saturday to Fountaintown, Ind.

The Sons of Columbus will give a progressive pedro party at their club rooms, on West Wayne street, Thursday evening of this week.

Mr. John Langard gave a very enjoyable sleighing party yesterday afternoon. They drove to the home of Mr. J. R. Poinson, near Wallen, and were royally entertained.

Miss May, who has been visiting Mrs. D. Harlauff, of West Jefferson street, expected to return to her home in Chicago Saturday, but was taken ill and is now at Hope hospital.

Last Friday evening, at her home, on Riverside avenue, Miss Lucy Rosselot entertained about twenty-four of her friends in a very delightful manner. There were games, vocal and instrumental music and a delicious luncheon was served before the guests departed at a late hour.

At 7:30 o'clock yesterday morning Messrs. Elmer Harley, Will Myers, Will Smith, Fred Hadden and Elmer Sulphia left this city and highly enjoyed a sleigh ride to Bluffton, where they were very pleasantly entertained by ex-Senator J. H. C. Smith. They returned to this city late last evening.

A most enjoyable sleigh ride from Monroeville to Convoy was participated in by the Misses Kate Baker, Grace Webber, Grace Monahan, Mary Sullivan, Anna O'Rourke and Constance Heller, Saturday. They were the guests of Miss Lou Niezer. The party left Fort Wayne on the early train. They were met by Miss Niezer with a large, comfortable sled and accompanied by Mrs. J. B. Niezer, dined at the Unique hotel, Convoy, returning to Monroeville in time for the evening train to Fort Wayne.

At a luncheon given recently in this city the ladies all wore their hats. This is quite the thing to do at any entertainment given before 6 o'clock.

A most delightful evening party was given at the home of Master Henry Bonifide Saturday evening. Those present were Misses Maud Sommers, Gracie and Maud Cline, Lizzie Smith, Messrs. Samuel Kelker, Tom Kelker, Jim Hoofle, Jim O'Brien, and Eddie Tancie.

A very pleasant and enjoyable surprise was tendered Miss Mamie Quin at her home by her many friends last Thursday evening. Cards and various other games were played during the evening and at 10 o'clock a dainty luncheon was served. Among those present were Rosella Carnandy, Myrtha Chamberlin, Lizzie Burnett and Rosella Fox, Bertha Tyrrell, Jessie and Gracie Malone, Pearl Hill, Dadie and Edna Clever and Mamie Quin. Little Cyrille Sheppard, of Covington, Ky., was the guest of honor.

Saturday evening the members of the "M. and O" club gave a delightful sleighing party. They drove eight miles into the country to the home of Mr. and Mrs. Andrew Blum, on the St. Joe road. The evening was spent in playing cards and games and dancing. Those present were Misses Anna Mettler, Lizzie Klug, Kate and Lulu Offenloch, Florence Wilcox, Kate Englert, Nettie and Lizzie Schuckman, Katie Angst, Callie Auman, Gertie and Maggie Sommers, Clara Stier, Messrs. Ed Freckman, Ben Kramer, John and Joe Auman, Lou Kramer, Joe Schaffer, Joe Derheimer, Marion Black, Henry Klug, Clem Schuckman, A. King, A. Alter.

BROUGHT BACK.

E. B. Mulley Landed in the Jail Last Night.

Ex-Deputy Sheriff Wilkinson Tells of His Trip to St. Louis—The Prisoner Refuses to Talk.

Last evening at 7 o'clock ex-Deputy Sheriff Tom Wilkinson returned from St. Louis, on the Wabash railway, having in charge the much talked of and sought for Mulley.

Mr. Wilkinson at once landed his man in the county jail. Speaking of the matter to a SENTINEL representative this morning, the ex-deputy said: "I had some trouble at first in getting the authorities to turn over the man to me, but after I had gotten my papers from Jefferson City I experienced no trouble. Mulley was perfectly willing to come and made me no trouble at all. He is quite a bright fellow. He told me first when he was at Huntington, just before he was married to Miss Poulson, he telegraphed to Des Moines, Iowa, to learn what had become of the suit for divorce brought by his first wife. He received the message that the suit had gone by default against him. Although the fact that the decree of divorcement had not been handed down, Mulley supposed that his wife was legally separated from him and proceeded with the marriage."

The prisoner was also seen at the jail this morning. He is a well dressed man of probably thirty years of age and weighs over 200 pounds. He came up to the bars and was asked if he had anything to say for himself. "No, I haven't," he replied. "There has been too much said against me already. What I have to say will be told in the court room." When asked if he had a wife in Iowa he refused to answer. It is said that he has held a number of fine positions in different cities. Up to 11 o'clock his wife had not called at the jail to see him.

Nothing will be done towards arraigning him until Agent Rhodes, of the Indiana Farmers Insurance company, arrives here from Indianapolis.

NEWS IN THE COURTS.

The justice courts were a blank this morning as far as cases of interest were concerned.

John A. Coy and Emma L. Iddings, James E. Clifford and Celia Keller have been licensed to wed.

Judge Dawson, in the superior court this morning, set a number of cases for trial and then went to Auburn, where he is hearing a case.

The case of Graves against the Muncie railroad is on trial in the circuit court.

James B. Paine was given a judgment of $4,358.51 against John M. Taylor on foreclosure of mortgage.

Two divorces were granted by Judge O'Rourke this morning. Jennie Haines was divorced from Mora Haines and given $500 alimony, and Mrs. Yoast was given a divorce from her husband.

Elizabeth Bailey, through her attorney, K. V. Emerick, brings suit for support against August Bailey. A divorce suit may follow.

The case of the state against Theodore Lahman on the charge of provoking William Branstratter, was tried in Justice Tancey's court Saturday. J. M. Robinson defended and P. B. Colerick and Will Ryan prosecuted. The defendant was acquitted.

This morning about 8 o'clock, as William Saffen, a fireman at the Central engine house, was out exercising two horses, one of them kicked and broke the left hind leg of George, a well known animal which was used in the fire service for the past ten years. The horse was so badly injured that it was found necessary to kill it by a blow in the head with a sledge hammer.

CRAPE ON THE DOOR.

Because Death Has Entered the Home.

Friends Mourn the Loss of Loved Ones Who Have Been Called From Earth.

Jacob Getty, proprietor of the Ossian house, Ossian, Ind., died of dropsy yesterday morning. Deceased was one of the oldest residents of Ossian. He was a member of company G, 101st regiment, Indiana volunteer infantry, and served from the organization of the regiment to the close of the war. He leaves a wife and two daughters, Mrs. Lula and Mrs. W. E. Davis, wife of the Pennsylvania yard dispatcher, of 55 Breckenridge street, this city. The funeral will take place from his residence Tuesday morning, at 10 o'clock, under the auspices of the G. A. R.

Milton Burkett, son of Dr. and Mrs. Burkett, of Warsaw, Ind., died at this city on Saturday morning. The family is well known in Fort Wayne.

The many friends of Mr. and Mrs. Patrick Ryan will be pained to learn of the death of their beloved son, Joseph D., which occurred on Saturday afternoon at the home of his parents, on Barr street. Joseph has been employed as a plumber by A. Hattersley & Sons, and some time ago was taken ill with a malady which resembled lead or sewer gas poisoning. He suffered greatly and was at the point of death some two weeks ago but rallied and was thought to be improving, but was taken worse last week. He was a young man loved and esteemed by his many friends and associates and his loss is keenly felt by the parents and brothers and sisters. His father, Mr. Ryan, by his sympathetic nature and benevolence has endeared himself to many families which have suffered a like sorrow, all of whom join in expressing their grief over the untimely loss of the young man, who was only nineteen years of age and unusually bright and intelligent.

The funeral services will be held at the Cathedral on Tuesday morning at 10 o'clock.

The funeral of Mrs. Samantha J. Bowser was held at the residence, 151 East Lewis street, at 3 o'clock Sunday afternoon, the Rev. Upliko officiating. The remains were shipped to Lucas, Ohio, Monday for interment.

The funeral of the late Joseph Hannan was held at the Cathedral at 1 o'clock today. It was largely attended.

The funeral services over the remains of Mrs. Louis Miller were held at the Simpson M. E. church at 3 o'clock this afternoon. They were very impressive. Many attended.

Mr. and Mrs. George King, of No. 112 Erie street, mourn the death of their little child, Edward, who died of brain fever yesterday. The funeral will be held tomorrow afternoon from St. Mary's Catholic church.

Peter Hoffman, a pioneer resident, died yesterday afternoon at 12:10 at the residence of Mr. Andrew Weber, No. 167 Clinton street. His wife, Mrs. Anna Hoffman, died a few months ago, and Mr. Hoffman has been failing ever since, the immediate cause of his death being erysipelas. Deceased was born in Lauschied, Kingdom of Prussia, Germany, April 8, 1817, and came to Fort Wayne in October, 1856. He has been employed in the Pittsburg, Fort Wayne and Chicago railway shops during his residence in this city. He leaves a daughter, Mrs. Caroline Schirmeyer, wife of Mr. Louis Schirmeyer, of the Saml. Peltz & Sons clothing firm, and a stepdaughter, Mrs. Anna Weber, wife of Mr. Andrew Weber, foreman of the Pennsylvania company's pattern department. A large circle of friends and acquaintances will mourn his death. The funeral will occur Wednesday morning at 8:30 from 167 Clinton street, and at 9 o'clock from St. Mary's Catholic church.

Albert Little, the infant child of Mr. and Mrs. H. A. Little, of No. 131 West Williams street, died yesterday of exhaustion. The funeral was held this afternoon from the family residence.

Ruth Hall, the six-weeks-old child of Mr. and Mrs. Edward Hall, of No. 26 Winch street, died of lung fever on Saturday afternoon. The funeral was held this afternoon.

The funeral of the late Thomas Kelly was held this morning at the Cathedral and was largely attended. The G. A. R. attended in a body.

A STATE CONVENTION.

Catholic Benevolent Societies Will Meet in This City on the 19th of March in General Session.

The St. Charles Barromeus Aid society elected the following officers yesterday:

President—Rudolph Krull, jr.

Secretary—Peter Nestler.

Sick Committee—Henry Burbiger, Louis Schwartz, Jos. Hergenrether and Chas. Hilker for the First ward. For the Second ward, Valentine Nix. For the Third and Fourth wards, Mathias App. Michael Graber for the Fifth and Sixth wards. Peter Harnischfeger and Peter Eckerle for the Seventh ward. Isidor Huber for Bloomingdale, and Herman Mildendorf for Lakeside and Spy Run avenue.

On the 19th of March all the German Catholic Benevolent societies in the state will hold a convention at the Princess rink. This convention will call to the city a large number of delegates from different parts of Indiana. Important questions will come up and the gathering promises to be of unusual interest.

Born, to Mr. and Mrs. Herman Limbach, on Wall street, a daughter.

DYSPEPSIA

Is that misery experienced when suddenly made aware that you possess a diabolical arrangement called stomach. No two dyspeptics have the same predominant symptoms, but whatever form dyspepsia takes,

The underlying cause is in the LIVER,

and one thing is certain no one will remain a dyspeptic who will [illegible]

SIMMONS LIVER REGULATOR

It will correct Acidity of the Stomach, Expel foul gases, Allay Irritation, Assist Digestion and at the same time

Start the Liver working and all bodily ailments will disappear.

"For more than three years I suffered with Dyspepsia in its worst form. I tried several doctors, but they afforded no relief. At last I used Simmons Liver Regulator, which cured me in a short time. It is a good medicine. I would not be without it."—James A. Roane, Phila'a, Pa.

JOS. F. ERVIN.

Subscribed and sworn to before me, this 1st day of February, 1893.

DANIEL W. SOUDER, Clerk.

THIS DAY IN THE PAST.

1626—Mme. Marie de Sevigne, famous for her letters, born; died 1696.

1665—Princess Anne, daughter of James II and later Queen Anne, born; died 1714.

1672—Augustine Calmet, Biblical scholar, born; died 1757.

1697—Completion of Trinity church, New York.

1721—Christian Heinecker, the most precocious child ever known, born at Lubeck, Denmark, he talked intelligently at 1 year, mastered reading and writing at 3, Latin and French at 4, and died at 5.

1756—Aaron Burr born at Newark, N. J.; died Sept. 14, 1836.

1778—France officially acknowledged independence of United States and promised an alliance.

1804—Joseph Priestley, scientist and freethinker, died in Northumberland, Pa.; born 1733.

1818—William Maxwell Evarts born in Boston.

1833—John Brown Gordon, soldier and statesman, born in Upson county, Ga.

1862—Fort Henry captured by Grant.

1890—The Australian federation conference opened in Melbourne with much enthusiasm.

TONIGHT.

SECOND PRESBYTERIAN CHURCH—Lecture by Rev. Leeper on "Yosemite and the Yellowstone National Park."

HENDRICKS CLUB—Meet at the Wayne Hotel.

GOOD TEMPLARS—Public Installation.

REVIVAL SERVICES—Grace Reformed, Wayne St. M. E., Christian, United Brethren, St. Paul M. E., Baptist Tabernacle.

LODGES—Phoenix lodge, K. of P.; Sol. D. Bayless lodge, F. & A. M.

WORLD'S MUSEUM—A new play on the theatre stage—Curio hall attractions.

THE Grubbs libel law of this state is a relic of barbarous days. The Indiana legislature should hasten its repeal.

REPRESENTATIVE DALMAN was at home over Sunday. Mr. Dalman is making an excellent record in the legislature.

HON. JOHN G. SHANKLIN, the editor of the Evansville Courier, is after a foreign mission under President Cleveland's administration.

HIGH water and floods will follow the departure of the snow, and destruction of property and probable loss of life may be expected in many localities.

THE privilege of selling pop-corn at the world's fair has been disposed of for $600,000. That seems a large sum to pay for that privilege, but the purchaser probably knew the capacity of the girls of the present day for popcorn.

AS A curious fact in the history of elections it is noted that Marcus Morton was twice elected governor of Massachusetts by a single vote. He was not only elected by the people in 1839 by one vote, as is generally remembered, but was also elected by the legislature in 1843 by a single vote. He was a candidate twelve years in succession before his first election.

THE twelfth anniversary of the founding of the Society of Christian Endeavor was celebrated by many societies last week. The growth of this society shows how much easier the world finds it to do good now that it has learned how. By discarding sectarian lines and prejudices and adopting modern ideas of organization a great religious society has been built up in twelve years which is equal in its particular line of work, its national conventions rivaling in numbers those of the great political parties.

PRESIDENT HARRISON is being severely criticised by republican senators for appointing Judge Jackson, a democrat, to succeed Justice Lamar on the supreme bench of the United States. In making the nomination President Harrison has raised himself above party and set an example that future presidents should follow in closing men for these high judicial positions. The supreme court is not only the tribunal of last resort in litigation; it is the final, indisputable arbiter of every question of constitutional interpretation. There, more than anywhere else in the whole system of government, should be found the most complete impartiality of mind, the most scrupulously avoidance of partisanship. This is the interest of the whole people, and it vitally concerns not only the interpretation of statutes and constitutions but the perpetuity of our institutions. After Mr. Lamar's death there remained six supreme court justices who were republicans before their elevation and only two who were democrats. Every partisan mind, on both sides, expected that Mr. Harrison would eagerly seize the opportunity offered still further to strengthen the republican preponderance of the court, but in this he disappointed them by naming a democrat, presumably in the conviction that such a choice was necessary to maintain a closer balance of political views among the members of the court.

PROF. HAUPT, of the oriental department of the John Hopkins university, has returned from Germany, where he has been in conference with the scholars making translations of the Bible under his direction. The first part of the Bible to be printed will be a critical edition of the Hebrew text of the book of Job, edited by Prof. C. Siegfried, of the University Jena. The book has been reconstructed in order to enable the reader to better understand it by putting verses in their proper position and sequence. Twenty-one pages of critical notes give the reasons for the various changes of the preceding twenty-seven pages of the Hebrew text.

Correct Speech.

Pronunciation is largely a matter of scholarship and moderately a matter of fashion. Where there is a well established pronunciation of a word, we should follow it; where there is a choice, we should take that which pleases our own taste. But we should not fall into mere affectations of speech such as are prevalent at present, especially in the "smart set." There is a tendency to make the flat sound of the first vowel serve for all of the vowel sounds of the language, after the manner of the beaux and belles of two hundred years ago, as represented in the comedies of that period. We should get, wisely advises the Rochester Post-Dispatch, the habit of correct speech in youth and trouble ourselves no further on the matter in after life, making no change consciously to suit the times. A mistake that is natural is no great matter, and not so bad, we think, as a noticeable primness and precision of speech; yet, better than either is that correct use of language which savors in no way of affectation, but is the clear and natural utterance of individual thought. We should never lower either sentiment or language consciously on the theory of "talking down" to our audience. Let us give everybody the best that we have in the best way we can.

Mechanical Bootblacks.

By the recent corporation in Chicago of a company for the manufacture of a machine for blacking boots an infant industry is threatened. The corner bootblack who calls: "Shine, sir?" so melodiously through his nose is soon to be deprived of his occupation. The usurper is a soulless, voiceless, impassive wooden box filled with whirring brushes. The new machine is quite simple. There is a little slit in the top of the box where the nickel is dropped. You then raise up a cover and press an ivory button. The brushes do the rest. One of them digs off the mud with a pleasant little hum; another deftly dabs on a coat of blacking, and then the big brush buckles down to business and does the polishing. There is no grunting. Elbow grease is not necessary. It runs by lightning. It only costs forty dollars to start with, and it doesn't eat, sleep or smoke cigarettes.

NEW proof that your true Briton jokes and enjoys humor "wi' deefculty" comes periodically to the notice of Americans. The smoking-room of an ocean steamer furnished a recent instance. An American was called upon in his turn for a story, but he excused himself under the plea that he had forgotten all the stories that he once knew. "In fact," said he, "I'm like the old woman who said there were three things she never could remember—names, numbers, and she'd forgotten the third." Everybody accepted the excuse as adequate, but the inevitable Briton piped up, after the laughter had subsided: "Ah, but that story of yours, you know, isn't it a bit of a puzzle?"

GEN. BUTLER was probably the owner of more land than any other citizen of the United States. It is located in various states, north, south and west. He owned immense tracts near Puget sound, where such property is valuable. He owned both sides of the great falls on the Potomac. His lands are worth millions of dollars, the only trouble being that some of the titles are not very clear and may lead to legal disputes.

ON Silver Heights, near Winnipeg, a few bison are kept, remnants of the enormous herds that rolled like a brown tide from the Texas plains to the Saskatchewan. The experiment is being tried of producing a race of hardy stock by breeding the bison with cattle. The offspring resembles the cow rather than the bison, but has a somewhat shaggy coat and an ill temper.

A RUMOR comes from California that raisin growers are forming a trust. Packers and brokers will be admitted, but the entrance fee will be higher for them than for growers. Raisins will be consigned only to packers and brokers who have given bonds of $10,000 and $20,000 respectively not to sell under prices fixed by the trust.

IT would be impossible to find a parallel to the progress of the United States in the last ten years. Every day that the sun rises upon the American people it sees an addition of $2,500,000, the daily accumulation of the republic, which is equal to one third of the daily accumulation of all mankind outside of the United States.

THE school children of St. Paul, Minn., were solicited the other day to bring contributions for the city poor. The result was one hundred and seventy-two great wagon loads of provisions and clothing, more than the city all told has given in three years.

GOV. HOGG, of Texas, gave utterance in his annual message to a recognized truth when he said: "The practice of carrying concealed and deadly weapons marks the unmanly spirit and cowardice of those who indulge in it."

THE Art Amateur calls attention to the fact that at Dry Earth the Indian women on the reservation are making lace, and states that the introduction of the industry has had an unlooked-for result in making them very neat lest much of the market value of their labor be lost.

HOW CAN YOU ESCAPE?

Powerful Sermon Preached by Rev. Dille on "Salvation."

The Sinner Urged to Accept Christ Before It is too Late—Rev. Welch at the Y. M. C. A.

Rev. W. H. Dille, of Cincinnati, an evangelist of rare eloquence and wonderful power, preached at both the morning and evening services at the Wayne street M. E. church yesterday to large audiences.

He had expected to remain in the city during this week and assist Rev. Eldridge, the pastor, in his revival meetings, but he received a telegram announcing the death of his brother, and as a consequence left today for Cincinnati to be with his brother's stricken family in their bereavement.

Rev. Dille's style of oratory is peculiar. He is a man who seems to be full of holy zeal and is wonderfully in earnest in his preaching, which at one moment has his audiences in tears and the next in laughter, always keeping them interested and attentive to catch his every word. Abounding in illustrations and the Sam Jones and Moody style of preaching, it is difficult to give an outline of his sermons and one can only get a correct idea of his great power to sway an audience by hearing him.

His theme last evening was "Salvation" and his text, "How shall we escape if we neglect so great salvation." Salvation, he said in commencing, has been my theme for years and will be my theme until I die, and then I expect to sing it with angels around the throne of God.

When I get to the gates of Heaven, they wont ask me whether I am a Baptist or a Methodist or a Presbyterian, for I will say I have been redeemed—washed in the blood of the Lamb. Oh, how glad I am that I can hold up such a salvation! How glad I am that I have a Christ who can defeat the devil every time! He can redeem me, He can regenerate me, He can start me out as a new man. When you get this salvation you'll know it.

It is a salvation that will save to the uttermost, a salvation that will take the lowest and vilest of sinners and make them regenerated men, a salvation that turns the whole current of our lives and puts us where we don't want to sin. I tell you, the Holy Ghost knew his business when He said it was a great salvation.

How shall we escape, if we neglect so great a salvation? Neglect! neglect! Oh what a terrible sin! There are more men going down to hell today from neglect than from any other cause. You may say that you are a moral man, that you live an exemplary life, that you are kind to your family, that you are charitable, that you help the poor, that you give to the churches, but I tell you that if you have all these and do not have salvation that you will go to hell very quick.

How can you escape? Is there any other way? Can the moral man tell me any other road that leads to Heaven? No, there is none. You must accept God's plan—salvation through the Lord Jesus Christ—or you are eternally lost. This may be your last opportunity. Every tick of the watch brings you one step nearer the grave. Every pulse beat shortens life and hastens the time when you must appear before the judgment bar of God. In eternity it will be too late. Oh accept salvation now while it is held out to you as a free gift.

PRESBYTERIAN MISSION.

Dr. Moffat filled the pulpit at the West Side Mission of the First Presbyterian church last evening, and preached a strong sermon from the text: "How shall we escape if we neglect so great salvation?" There was a large congregation present, and at the close of the meeting eight persons united with the church. The Haydn quartet was present and led the singing. There will be services again at this mission next Thursday evening at 7:30 o'clock, when the ordinance of baptism will be administered, and an invitation is extended to all who desire to unite with the church.

REV. WELCH AT THE R. R. Y. M. C. A.

The services at the rooms of the railroad department of the Young Men's Christian association yesterday afternoon were conducted by Rev. J. W. Welch, the pastor of the Simpson M. E. church, who delivered a practical and interesting discourse from the text found in the first chapter of First John, "If we confess our sins, he is faithful and just to forgive us our sins and to cleanse us from all unrighteousness." No man, the speaker said, is without sin. The moralist may make this boast, but in the eyes of God he is a liar, and unless he bows at the feet of Jesus he cannot be cleansed. Conviction of sins is one of the first elements necessary in God's plan of redemption, but conviction alone is not sufficient. We must have an honest sorrow for this violation of the divine law, ask for forgiveness, put our trust and hope in Christ and strive to follow in His footsteps in our daily life. If we walk in the light, as He is in the light, we have fellowship one with another and the blood of Jesus Christ cleanseth us from all sin. The speaker's remarks abounded with interesting illustrations and he held his audience attentive listeners until the close.

The Fort Wayne Saengerbund last evening celebrated its twenty-fourth anniversary at its hall on East Main street. The affair was a most enjoyable one. None but members were present. Next year the society will celebrate its silver jubilee in the new club house on the corner of Main street and Maiden Lane.

IN AND OUT OF ANDERSONVILLE.

On the Bright Side of Life in a Rebel Prison, at Y. M. C. A. Hall Next Thursday Evening.

Old veterans and the sons of veterans, with many of those who have come on the stage of action since the great civil strife, will be glad to hear from one who knows about some of the bright things of prison life. Mr. Smith is a brilliant off-hand speaker, and when he talks of the boys in blue his words glitter and sparkle like a cluster of sabers in a cavalry charge. "This lecture is thoroughly Christian in tone and, while keeping alive the heroism, will not revive the passions of the war," says Rev. J. W. Bashford, D. D., president of Wesleyan university, Delaware, O.

THE DIAMOND.

Mark Baldwin has tackled insurance as well as real estate at Homestead, and says he has pitched his last ball.

Mike Slattery, the ex-giant, is anxious to get into the big League again, and has commenced to train already.

John F. Smith has been elected manager of the Bristol, Pa., club for '93. This is Phenomenal Smith, the ex-pitcher.

Buck Ewing sticks close to his home in Pendleton, and is seldom seen in the Cincinnati haunts of professional ball players.

The Pittsburg Club and pitcher Abbey have agreed upon terms, and the ex-collegian will pitch for the club the coming season.

Capt. Tebeau thinks the Clevelands will go South for spring practice, as the weather is too cold in Cleveland in the spring.

Joe Mulvey isn't doing anything this winter, and sticks close to his fireside. Even the Gloucester races have no attraction for him.

President Robison of Cleveland has received over fifty applications from "young blood" players for positions in the Cleveland team.

President Buckenberger has requested President N. E. Young to schedule the Pittsburg ball team to open the coming season at home.

Hardie Richardson is at home in Utica, N. Y., where he will probably go in business. The chances are he will not play next season.

THE CHILDS TROPHY.

The Philadelphia Chess Players Get a Beautiful Gift.

The great philanthropist, George W. Childs of the Philadelphia Ledger, has presented to the chess players of that city a large silver chess cup for yearly competition in a tournament to be under the management of the Franklin Chess Club. The cup is in the shape of a massive castle, highly polished and elaborately engraved. On one side is the etched portrait of the donor, the pleasant features of Mr. Childs standing out well on the bright surface; below the portrait is the inscription: "George W. Childs Chess Cup. Presented to the Franklin Chess Club, 1892."

It is intended that the cup shall be a record of the champion chess players of Philadelphia, and the name of the winner each year will be engraved upon it. The tournament commenced Dec. 5, 1892, and will be in progress several weeks. The rules provide that each shall play three games every two weeks until he has played two games with each of his competitors.

The players who have entered the tournament are Walter Penn Shipley, Herman Voigt, M. Morgan, M. Livingston, Hallis Webster, Emil Kemeny, A. Hale, J. P. Morgan, S. W. Brampton and H. G. Hoban. Mr. Voigt is the present champion of the Franklin Chess Club, and won the first prize in the handicap tournament of the New York State Association last summer. Emil Kemeny has only lately moved to

CHESS CUP.

Philadelphia. He was the best player of the City Chess Club of New York and won the Ottendorfer Staats-Zeitung chess cup for that club last summer.

FOOTBALL.

George Hilliard, 21 years old, a student in Albert College, Belleville, Ont., died from injuries which he received in a football match several weeks ago.

A serious accident befell August Porter Thompson, '95 Sheff., who was a member of the freshman football team this last fall at Yale. Both of his legs were broken while coasting on New Year's day at his home in Honesville, Pa.

A Suburban Football League has been organized in Eastern Massachusetts comprising teams from Newton, West Roxbury, Natick, Dedham, Needham and other towns yet to be selected. Each team will be allowed twenty players to choose from, and the names of the players must be sent to the president a week before the first game is played, so as to be acted upon by the Governing Committee.

Col. Charles K. Greenleaf, Deputy Surgeon General United States Army, has a new system of training. Its superiority, it is said, was practically demonstrated in the recent game of football between the Naval Academy and West Point. In that game several of the coming generals were entirely helpless when carried off the field, while the commodores were quite fresh. The Naval Academy has used the system for one year.

RESPECT FOR BOOKS.

The Way One Handles a Volume a True Idea to His Character.

"I distrust the intelligence of any person whom I see handling a book disrespectfully," a lady declared the other day. "A good book is one of the best of friends, and deserves good treatment—not merely that one should not strain its back or crease its pages, but to be treated with delicacy, consideration and respect.

"When I see a thoughtless girl put her hand toward a fine volume of Shakespeare, and begin to flutter the leaves as she talks, or nervously clap the upper cover by way of emphasis to her remarks, I feel like saying to her:

"'My dear, you forget yourself! Remember Rosalind; consider Viola; do not be rude to Portia; they are friends of mine if not of yours, and are ladies of distinction, not to be treated like the sentimental heroines of such trashy novels as you roll up and stuff in your pocket, or cram into your lunch-basket to read in the cars.'

"I never do say it; but I am far from certain if it would not be a justifiable impoliteness if I did."

Indeed, it is quite true that the mere way in which one lays his hand upon a book is often a strong indication of character. The person who reads little is apt to handle a book either with clumsy and excessive care, or with the recklessness of ignorance. The reader of trash, in the presence of solidity and long paragraphs, betrays himself often by a dismayed pucker between the brows, or by lifting the volume near his face as if suddenly become near-sighted.

The ill-advised person who has the skimming habit looks at the end first, turns back to the beginning, dips into the middle, and flits skippingly hither and thither, fluttering the leaves like a puff of wind.

The book-lover, the reader who reads wisely and understandingly, does not do these things. It is commonly the reader of trash who ill-treats and fails to respect the most patient, unresentful and helpless of our friends. No well-bred person abuses a book intentionally; one who is both well-bred and well-read can not fail to treat a good book well, and bad books, silly books and false books he will leave on their shelves.

Light literature holds its proper and honorable place in the world of letters, but trash is not literature and has no place there. As one who has fallen into associating with frivolous and foolish people soon shows it in his manner, even when in better company, so the foolish girl or boy whose mind is steeped in trashy reading soon betrays it in many ways, and one of them is his feeling toward real, genuine and elevating books.

Handling a book with apparent respect or disrespect is of course too fantastic a standard to be accepted literally, since physical awkwardness or nervousness may be responsible for harm rather than a lack of mental grace. But it is none the less true that the close companion or friend of the great authors acquires often what might almost be called a special courtesy towards books. He learns to feel toward them as did the first great English poet, Geoffrey Chaucer, who wrote five centuries ago:

> In bokes for to rede I me delyte,
> And in myne herte have them in reverence.

—Youth's Companion.

BONNET'S HISTORY.

The Remarkable Productions of a Single Aphis.

Bonnet commenced operations by isolating at birth a solitary aphis on its food plant, the hop vine. It grew rapidly and molted four times in eight days, by which time it had almost reached its full size. Soon after this there happened what at that time was considered a very extraordinary thing. The aphis had attained maturity, but, instead of proceeding to take to itself a mate and make preparations for egg laying, as all properly constituted insects had hitherto been expected to do, it remained quietly feeding till the eleventh day, when it brought into the world a living duplicate of itself. It then went on producing rapidly, and at the end of twenty-one days it had given birth to ninety-five young.

Bonnet then proceeded to isolate one of this second generation, and the same history was repeated, the second aphis bringing into the world in a short space of time ninety living young. Further experiments enabled Bonnet to observe this interesting history repeat itself for nineteen generations. It was found that at the end of the season these prolific generations came to an end, and fully-developed males and females were produced which mated. The female laid a few eggs in the ordinary way, and these hatched out the following spring into individuals in which the strange cycle was begun over again.

Bonnet had observed nineteen generations. Subsequent observers proved that under suitable conditions this number might be greatly extended, but the original observation (since many times confirmed) has been quite sufficient to suggest food for reflection to science down to the present time. Prof. Huxley once worked out a calculation which put what is but an incidental aspect of the question in a very striking light. Assuming each aphis to weigh the one-thousandth part of a grain, and a man to weigh 2,000,000 grains, the tenth brood alone of a single aphis would weigh as much as 500,000,000 of men, or more than the whole population of China.—Longman's Magazine.

THE LONG WAY AROUND.

An Oxford Instructor's Affectation in the Use of Words.

Lord Stowell, the famous judge of the admiralty court, was at one time instructor in ancient history at Oxford. His admiration for Dr. Johnson carried him so far that he copied the doctor's faults of style, such as his care to avoid the mention of anything familiar by its common name.

Describing the houses of the Athenians, he told his audience "that they had no convenience by which the volatile parts of fire could be conveyed into the open air." He meant no more than that the Athenians had no chimneys.

He would turn and double, in order to avoid the words butter and cheese, and would talk several minutes about shoes without once naming them. Whenever he let slip out a familiar word, because he could not substitute an imposing synonyme, it came from him with as ill a grace as an oath would from a bishop or the language of Billingsgate from a fine lady. He would not call a spade a spade, which Johnson could and did.

"Puppy!" exclaimed Johnson, as he contemptuously threw aside Rev. Dr. Harwood's "Liberal Translation of the New Testament." He had discovered that the translator had turned "Jesus wept" into "The Saviour of the world burst into a flood of tears."—Youth's Companion.

A Palpable Untruth.

Cumso—I always regarded Dr. Kapsool as a truthful man until yesterday.

Fangle—What happened then to upset your belief in his veracity.

Cumso—He told me his practice was so heavy that he hadn't time to send out bills to his patients.—Truth.

ORANGE ORCHARDS.

A Grower's Device to Prevent Injury by Frost.

A device is in use in Riverside for the protection of the orange crop from frost, which, it is believed, will be worth millions of dollars to the orange growers of sections which are not in the frostless belt. Riverside, while leading the orange-producing section of Southern California, is not a location which would have been selected for a citrus industry by the original settlers had they possessed the experience of the producers of to-day.

Every winter the orange growers there have to resort to the use of tar pots to be lighted on cold nights so as to make a dense smoke or smudge, and keep the temperature above freezing. Last Christmas even these methods failed, and the loss to the Riverside valley by the freeze is estimated at $1,000,000, of which one grower, H. B. Everest, who owns the largest bearing navel orange orchard in the world, lost $20,000.

Mr. Everest, who was formerly engaged in manufacturing petroleum oils, has been experimenting for several months with other materials for burning in place of tar and brush, and has perfected an apparatus which, it is claimed, will prevent the frosting of fruit, even when the temperature falls as low as 18 degrees or 20 degrees and remains there for several hours. This heating apparatus has been placed throughout Mr. Everest's eighty-acre grove at a cost of over $2,000, and is being adopted by several other growers. It will not be patented and is a simple device that any horticulturist may prepare.

Briefly described, the contrivance consists of a hundred-gallon iron cask on each acre filled with oil, from which two pipes run along between the rows of trees, with half a dozen elbows to the acre twenty feet apart, over which are flat sheet-iron pans into which oil spatters and burns as it vaporizes. Burning at the rate of one gallon per burner every hour, an intensely hot flame is made, which rises several feet and creates also a dense smoke which acts as a smudge. The cost of the plant is $25 per acre, and the oil should not cost over $7 an acre. It is believed that this method will eventually be largely used not only for citrus orchards, but also in growing winter vegetables wherever there is danger of frost.

The Plain Truth

Is good enough for Hood's Sarsaparilla—there is no need of embellishment or sensationalism. Simply what Hood's Sarsaparilla does, that tells the story of its merit. If you have never realized its benefits a single bottle will convince you it is a good medicine.

The highest praise has been won by **Hood's Pills** for their easy, yet efficient action. Sold by all druggists. Price 25 cents.

An Invaluable Remedy for Colds.

Sheriff Hardison, of Tyler county, W. Va., was almost prostrated with a cold when he began using Chamberlain's Cough Remedy. In speaking of it he says: "It gave me almost instant relief. I find it to be an invaluable remedy for colds." For sale by druggists.

Frozen Potatoes.

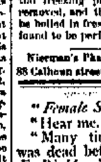

Frozen potatoes can be restored to palatableness by peeling them and letting them lie in a cool place with plenty of cold water poured over them. In twenty-four hours all the sugar which has been formed during the freezing process will have been removed, and the potatoes can now be boiled in fresh water and will be found to be perfectly palatable.

THE SPOT CASH GROCERY.

L. Schepp's New Improved Shredded Cocoanut.

1 lb Packages, 35c, or 3 for $1.00.
1-2 lb Packages 18c, or 3 for 50c.
1-4 lb Packages 10c, or 3 for 25c.
1 lb, bulk, or 30c.

MR. L. SCHEPP is the First to Manufacture in the United States, SHREDDED COCOANUT, by which process all the natural flavor and oil of the NUT is retained. He gives an Absolute Guarantee that his products under the Trade Mark above, are free from Parafine or Cotton Seed Oil.

The light and flaky appearance and condition of goods, and their keeping qualities makes them much more economical and convenient than the fresh nut.

He is the pioneer also, in the Manufacture of DESICCATED COCOANUT, and the Largest Manufacturer in America—if not in the World. We handle DESICCATED IN BULK; selling 1 lb. for 20c and 6 lbs. for $1.00.

"THE SPOT CASH GROCERY" are constantly distributing FREE SAMPLES of various commodities they handle, giving consumers the chance to test the merit of goods, new to many housewives. They have given away over 50 lbs. (free) of SCHEPP'S SHREDDED COCOANUT, as well as Chocolate, Farinaceous Samples, Salad Dressings, Etc.

RAILWAY RUMBLINGS.

The Pittsburg Makes an Effort to Break the Blockade.

Accidents, Incidents and Personal Mention of the People About the Railway Centers.

The erecting gang in the Pittsburg shops were compelled to work yesterday in order to finish repairs on several engines, which the company needed badly. As a result of their labors engines 631, 186, 159, 901 and 39 were turned over to Road Foreman A. H. Polhamus and sent out on the road today. Engine 518, from the Cleveland and Pittsburg division, and Nos. 44, 47, 99 and 230, from the eastern division of the Fort Wayne branch of the Pennsylvania system, were received here yesterday and put to work in removing the blockade, which task, it is hoped, will be completed in a few days. In the meantime all local freights have been annulled until further notice.

RIGHTS OF A RAILWAY COMPANY.

Some time ago J. W. White got aboard an Evansville and Terre Haute train and attempted to ride without paying his fare, stating that he had lost his ticket. The train crew was compelled to eject him by force, whereupon White sued the company in the Sullivan circuit court. There he lost his case and appealed to the supreme court. A few days ago a decision was rendered affirming the ruling of the lower court, holding that:

1. The conductor and employes of a railroad train when rightfully ejecting a person from a train may use such force as necessary and the company is not liable unless the force goes beyond this and becomes unlawful. A complaint based upon the use of unnecessary force in ejecting a person from a train must plead facts affirmatively, showing that the force used was unnecessary and therefore unlawful; mere epithets will not supply the place of facts.

2. A complaint for damages for wrongfully ejecting a passenger from a train is bad unless it is alleged that such passenger tendered the usual fare as a ticket. The mere allegation of the purchase of a ticket at the station is not sufficient.

3. In such a complaint it is also unnecessary to allege that the rules of the company provided that the train on which he took passage should stop at the station named on his ticket or at his destination, and this necessity is not avoided by the fact that the ticket agent told the passenger that he could take passage on that train.

TRAIN DISPATCHERS.

"Many people have an idea that a train dispatcher controls every movement of each train on a railroad and that no trains can move without his orders or permission," said a train dispatcher the other day. "This is a mistake, as each train has a scheduled time. Each conductor and engineer is provided with a timecard showing the time of each train on the road and where to meet and pass each other, and if all trains were run exactly on time there would be no use for train dispatchers. I have heard people make remarks about the responsibility of a train dispatcher. Even newspapers take up and convey the idea that if the train dispatcher relaxes his watch on the trains for a single minute a collision is liable to occur. This is another great mistake, as, if trains or trainmen follow the rules and schedule and the train dispatcher lets them alone, they would run until doomsday before they would "get together," as the railroad boys say. It is only when trains become late that the train dispatcher gets in his work. If it were, as a great many people imagine, that trains are started out like a raft down a river to trust to luck and a train dispatcher to pull them through, I would not want to travel very much in this country, for about the first day out some backwoodsman in felling a tree would break or cross all the wires and the train dispatcher would sit in his office and imagine he heard the engines come together. But under the present system of train dispatching the wires may all be swept away by a cyclone, but still there is no chance for a collision. It is when the train dispatcher does interfere with the running of trains that he must be careful to see that no mistake is made by himself or the operator who delivers the order to the conductor."

BRIEF MENTION.

J. E. Hayes, a machinist, is sick and unable to work.

Manager R. T. McDonald has returned from New Orleans.

A. A. Aikens has resumed his duties at the Electric Light works.

Fireman Gus Fruimuth, of the electric light works, is sick and off duty.

George Rhinesmith, shipping clerk for Rhinesmith & Simonson, has recovered from an illness of over two weeks.

Pittsburg engine No. 55 went into the shops today for general repairs.

The two-year-old child of William Wurtle, of the Electric works, is quite ill.

William Kellan, a blacksmith at the Bass works, is unable to work on account of sickness.

Master Car Builder J. A. Graham has left the city on business for the Pennsylvania company.

J. Thain, of the Electric Light works, had the misfortune to mash a finger Saturday. He is off duty.

Louis Miller, boilermaker in the Pittsburg shops, is off duty on account of the death of his cousin.

Al Throckmorton, George Keller and O. Carter are on the absentee list at the Pittsburg blacksmith shop.

William Bahde, a boilermaker, for some time employed at the Bass works, has quit that establishment.

F. Bayless, who had a foot injured two weeks ago, has returned to his duties at the Electric Light works.

J. A. Lauth, W. Doctor and L. Nord, employes of the Pittsburg lumber yard, resigned their positions this morning.

Gus Fromuth returned from Galion, Ohio, Saturday and this morning reported at the Bass machine shop for duty.

Fred Hopp, of the Pittsburg planing mills, is receiving congratulations today upon the arrival at his house of a girl baby.

Walter Abbott has returned from a visit with relatives in New Jersey. He is employed by the Electric Light works.

Lloyd Judy resumed his old position in the Pittsburg machine shop this morning, after an absence of several months.

William Block, who was repairing a boiler at Monroeville last week, reported at the Bass shops for work this morning.

Work on frames for six more class X engines was taken up by the men in the Pittsburg blacksmith shop this morning.

Pittsburg Passenger Conductor John Sloan, who has returned from a visit to Canton, Ohio, went out on his regular run last night.

David Bitner, a clerk in Mungovan's grocery, has gone to Lucas, Ohio, to attend the funeral of his mother, which occurs there today.

The Pittsburg wreck crew was called to Selby, Ind., at an early hour this morning, to place three derailed freight cars upon the track.

Engineer Isaac Clem, of the Grand Rapids road, has recovered from his recent illness and this morning went out on his regular run.

Fred Lentz, the springmaker in the Pittsburg blacksmith shop, reported for duty this morning after an absence on account of sickness.

D. Boyles and Murray Smith are engaged in putting up wires for running the elevator in the new store room at the electric light works.

William Cherry and L. M. Misner are not working today, both being sick. They are machinists and are employed by the Pittsburg company.

Fred Paul, who met with an accident Saturday, is lying at the Hope hospital, instead of St. Joseph hospital, as stated in some of the city papers.

John T. Leach came up from Indianapolis Saturday afternoon and this morning returned to that city. He has important business down there.

Yesterday and last night the Grand Rapids and Indiana road turned over to the Nickel Plate sixty-four car loads of flour consigned to Buffalo parties.

The Olds Wagon works are idle today on account of a broken line shaft. Repairs are under way, and it is expected the works will start up again tomorrow.

Andy Huber returned to his work in the Pittsburg shops this morning. A month ago he fell and fractured a wrist bone and has since been unable to work.

Owen Barry's steam hammer in the Pittsburg blacksmith shop broke down Saturday and Mr. Barry and his crew are off duty until the machine can be repaired.

President Roberts has refused an increase of salary from the Pennsylvania company. He now receives $30,000 annually, and says that is all his services are worth.

Foreman George H. Judy left last night for Pittsburg, Altoona, Columbus and other points in the interest of the Pennsylvania company. He will be absent several days.

Machinist A. Conslan expects to receive patent papers on an Undried Brick protector in a week or two. He has received notice that the patent will undoubtedly be issued.

H. R. Dering, general passenger agent of the Pennsylvania lines, has been transferred from Cincinnati to Chicago, taking the position at the latter point vacated by J. H. Luce.

George H. Pegram, of St. Louis, assistant chief engineer of the Missouri Pacific railway, has been appointed chief engineer of the Union Pacific system, with headquarters at Omaha.

Joseph Miller, fireman for Engineer S. S. Scoville, of the Wabash yards, is suffering with a lame toe. Drs. Morris and Krone, emergency physicians, have each examined the injured toe, but failed to agree upon a diagnosis.

Clifford Moran, an employe of the Standard wheel works, is minus the index finger of his right hand. While running a spoke shaper Saturday evening he had the finger cut off by the machinery. Dr. J. R. Miller dressed the wound.

The Keystone Cycling club will probably have a picnic at Devil's Hollow, out on the Huntington road, next Sunday. The object of this midwinter excursion is to use up the surplus funds in the club's treasury before the opening of another season.

Yardmaster and Mrs. W. E. Davis have been summoned to Ossian by the death of Mrs. Davis' father, Jacob Getty. The deceased was an old resident of Wells county and for over twenty years managed the Getty house at Ossian. He was quite well known in this city.

An "Uncle Tom's Cabin" troup came in from the west this morning and took the Wabash train for Defiance, Ohio. They carried a car load of scenery.

The following Pittsburg trainmen have reported for duty after an absence, chiefly on account of sickness: Engineers John Mooney, S. S. Hedges, W. T. Jackson and J. Grable, Firemen Sam Spence, H. S. Brown, C. Walters, A. Sine, W. H. Webster, D. J. Heynes, W. F. Jungles and Sidney Setts.

The following may appear incredible, but nevertheless it is quite true: "For years past a Sunday school by telegraph has been held weekly on an American railroad. The superintendent asks the class questions over the wire at different stations, prayers are said, and a chapter in the Bible read—all by wire."

Pittsburg round house absentee list: Engineers W. Slagle, K. McCarthy and W. G. Lyons, sick; Firemen J. S. Wilson and A. A. Greenich, sick; Fireman E. Henchen, business; Fireman R. H. Craig, lame wrist; Fireman H. Bollinger, wife sick; Fireman T. H. Ryan, attending funeral; Fireman S. Gable, family sick.

Fred H. Pageler, a clerk at the Standard Wheel works, has tendered his resignation to take effect February 28. He will complete a business course at the International college, commenced some time ago. Mr. Pageler has held his present situation about three years and his services have been very satisfactory to the company.

The little girl recently born to Mr. and Mrs. Richard Neff at Indianapolis, has been named. Mr. Neff, whose heroic deed at the Lake Erie wreck has been recognized by all the papers, after returning home from the Wabash hospital christened his first born Lelia Etta Winnie Neff, or L. E. & W., for short, in remembrance of the wreck.

Arthur H. Dougall, clerk at the Electric Light works, is considering an offer of a good position in the office of the Gravel and Improvement company at New Orleans, Ala. If he accepts he will leave for that city next Monday. Arthur says he does not like to leave this city, and the only inducement at New Orleans is the handsome salary connected with the position which awaits him.

The Boston Concert company, sixty-four people, passed through the city this morning on a special train running as the second section of No. 25. The troupe is en route from New York to Chicago. Another party passing through this city was the French Opera company, fourteen in number, en route from Chicago to Philadelphia. They had a special car on the Keystone express yesterday.

Patrick Lupton, Charles Walsh and Daniel Hoynes have been appointed a committee of arrangements for the annual ball of the Brotherhood of Locomotive Firemen, which will be given in Randall hall on the evening of Easter Monday. These balls are always brilliant affairs and each year are the dance events of the season. Elaborate arrangements are now in progress to make the coming ball the most pleasant of any of its predecessors.

Dr. F. L. Flanders, a retired physician and capitalist, of Kansas City, was arrested Thursday night for using the mails for fraudulent purposes. Dr. Flanders, it is alleged, represented himself to be the president of the Kansas and Missouri Transportation company, a mythical railroad and sent to the passenger agents of all the roads in the country passes over his line, requesting that the favor be reciprocated. Many roads responded. A warrant has been issued for F. L. Flanders, jr., the doctor's son, who is charged with being his accomplice.

The coroner of Miami county in rendering a verdict in the case of Henry Griffin, killed in the Lake Erie and Western bridge wreck, bears down heavily upon the railroad company. He finds that "the deceased came to his death by being scalded by hot steam and being crushed by the wreck of a north bound train of cars on the Lake Erie and Western railroad on the morning of the 20th of January, 1895. Said accident occurred at the south end of the railroad bridge which spans the Wabash river in Miami county three-fourths of a mile from the city of Peru, in said county and state, and that the cause of said accident was the derailing of the train near the wooden trestle work which formed the approach to the said bridge and that the timbers composing said trestle work were decayed and unsound."

The Pennsylvania company will soon enter Buffalo. In fact terminal facilities on the lake front and the right of way from Canandaigua, N. Y., to Buffalo have already been secured and as soon as favorable weather arrives work on the extension will begin. The company has set aside $20,000,000 for this work. Its object in building the extension is to get a share of the lake trade. Another improvement in the Pennsylvania system is a traffic arrangement with the Central railroad of New Jersey, by which the Pennsylvania people shorten their coal haul from the mines to New York, 120 miles. Instead of going via of Harrisburg and Philadelphia the company will now strike the New Jersey Central at Nanticoke, thence to Phillipsburg where it will strike the Belvidere branch of the Pennsylvania lines and thence to New York.

"I have been using Salvation Oil for a lame back and think it is the best remedy I have ever used." C. E. Durling, 15 Central ave., Lynn, Mass."

Born to Mr. and Mrs. H. A. Rogers, of No. 55 Walter street—a son.

Lorenzo J. Conner, 101 Green street, Albany, N. Y., says: "I have used Dr. Bull's Cough Syrup and find it very beneficial and can safely recommend it as a good remedy for coughs."

WORLD'S PROGRESS.

AS MARKED BY LATE SCIENTIFIC DEVELOPMENTS.

A Great Triumph in Marine Engineering—A New Shuttle-box—A Handy Pen Rack—For Training Bicyclists—Other Useful Inventions.

A Pen Rack on the Sleeve or Cuff.

A convenient attachment for the sleeve or cuff of a coat or other garment, designed to hold a pen or pencil within easy reach, is shown in the accompanying illustration, and has been patented. It consists of a frame-piece composed of an upper and lower plate,

carrying between them the lower portions of a spring wire coil, the individual coils of which are sufficiently spread to receive and hold between them one or more pens or pencils. Attached to the holder is a spring clamp, one member of which presses against the inner side of the sleeve or cuff, gripping it with a spring pressure sufficient to maintain the holder in position on the outside of the garment. If desired, a strip of blotting paper may be held between the cuff and holder.

An Engineering Triumph.

Successful methods in securing suitable foundations for sea walls are among the most important of modern engineering triumphs, and one of the latest of these is what has come to be known as the Shield system, originated abroad, and of special adaption where the bottom is of irregular rocky surface. Careful longitudinal sections are taken along the lines of the inner and outer faces of the foundations, and planks cut and nailed to timbers in such a manner that one edge of the finished frame conforms exactly with the rocky bottom; these frames are weighted and sunk into place, where they are fastened by long bolts wedged into the rock in such a manner that a mould for about twenty feet of the bottom of the wall is thus formed. The tops of the frames are brought to a true horizontal position by means of a spirit level, and the space between is filled with concrete; where a large mass of the latter is used, it is composed of four to four and one-half parts of sand and gravel to one of Portland cement, the top being finished off with concrete composed of one and a half to two parts of sand and gravel to one of cement. The material is lowered in a canvas bag holding about two and one-fourth cubic feet, and so arranged that the bottom can be easily opened when it touches the spot where the concrete is to be laid. The material as it leaves the bags is simply pressed down by the flat hand to the required level, and then gently struck off by a straight edge resting at each end on the frames. In this way a perfect surface is formed five or six feet below low water, becoming hard enough in three days to receive the blocks of the wall.

A Useful Invention.

A recent Rhode Island invention is described—a two-shuttle smash preventer, the mechanism being applied to the breast beam and lay or swinging frame of the loom. It appears that, by this contrivance, when the lay comes up to the cloth the shuttle box is changed, so that if the right motion is not given the belt is thrown off, and the lay prevented from turning over, and stopped just before the picker stick strikes, thus keeping the shuttle in the boxes and preventing any smash in the warp. The loom cannot be again started until one of the shuttles is taken out from the box on either side; the empty box operates so as to prevent the mechanism connected with the machinery from stopping the loom. The desideratum is secured by means of a rod placed under the breast beam, and fastened to the same, to this rod being attached a strong hook, which acts with a similar reversed hook attached to the lay, so that, when the latter comes up to the cloth in the process of weaving, these hooks slide up on each other and become locked. But the locking of the hooks occurs only when there is a shuttle in each box, and the movement of the picker stick at this particular instant would cause a collision and smash. When the hooks lock the belt is thrown off by a finger connected with the handle rod, and the loom is thus stopped.

Photographing Films.

An interested suggestion has been made in photographing processes, namely, that the sensitive films might be so associated with transparent soluble films containing developing material that, while the primary action of the image-forming light would be absolutely unaffected, simple immersion of the exposed plate in a dish of pure water, or other solvent, would suffice to set up chemical interaction between the materials constituting the associated films, and would result in the development of the image. Thus, for example, it is thought that the sensitive surface of an ordinary plate might receive a preliminary coating of a gum or other transparent and soluble varnish, over this to be laid a clear, soluble film, containing matter capable of affecting development; when dried, this film or developer might be itself gummed over, and then coated with a further soluble layer, containing such other chemical constituents as might be desirable to have present, but, pending the occasion for development, sufficiently isolated to avoid the possibility of chemical reactions. Among the different media mentioned as supporting and isolating layers for the suspension of the developing agent in this case are collodion, soluble silicate, etc. In remarking upon this process, a writer in the Optician suggests, very aptly, whether the convenience of such plates, having combined layers of sensitive and developing salts, would not be more than counterbalanced by the obvious disadvantages which present themselves.

Water for Dyeing.

The following simple process is said to prove peculiarly suitable for determining the adaption of water for dyeing purposes. A standard color solution is made by digesting distilled water for twenty-four hours upon a large excess of ground logwood in a stoppered bottle; the clear liquid is carefully poured off at the end of this time and preserved for use in a stoppered bottle. If it is desired to examine a number of samples of water, a set of clear, white phials are employed, holding about five ounces each. In one of these are put four ounces of distilled water and one hundred grain measures of the logwood liquor; then four ounces of each sample are put in one of the other bottles, 100 grain measures of the logwood liquor being added to each, and the colors compared. The phial with the distilled water will be of a clear, reddish amber color; the others will depart more or less from this standard, according to the nature and the quantity of their impurities—as, if a soluble chloride, muriate, is present the color produced will be yellower than in case of distilled water. Sulphate of lime and alkaline sulphates, if present, give a yellowish olive tint; alkalies, whether caustic or carbonate, produce a brownish red; alum, sulphate of alumina, etc., a kind of plain color; free acids yield a cherry red; while the salts of iron and the chromates give a brownish black.

Cement for Pasting.

Experiments with various substances prove that the best cement for pasting parchment paper is casein glue, its superiority for this purpose to the so-called chrome glue consisting in the fact that the latter produces yellow or brownish spots where it has been employed in this way. The character of casein glue is of course well understood—a solution of casein, which appears as whey or drop when milk is allowed to curdle. The glue is dissolved in a saturated solution of borax, and on being dried in the form of transparent gelatin it appears as grayish white and somewhat brittle matter, which can be easily dissolved in water and possesses great adhesiveness. When employed for uniting parchment paper a thin paste is prepared, used in the customary manner, and the jointed places afterward exposed for a brief period to a jet of steam.

New Trainer for Bicyclists.

There have been quite a number of home trainers invented for bicyclists, but perhaps the most ingenious is the one which has just been completed by Arthur L. Banker for the Pittsburg Athletic Club. By means of this apparatus a rider can get the full benefit of road practice, bring all the muscles into play that are used in general riding. Heretofore training machines have only given the rider the develop-

NEW TRAINER FOR BICYCLISTS.

ment in the legs, but Banker's apparatus compels a man to use all the muscles to keep his equilibrium that are usually exercised in road riding. The machine consists of three rollers 3 feet 10 inches in diameter and placed sufficient distance apart so that the rear wheel bears on two rollers and the front wheel on the single roller. A rubber belt running from the rear to the front roller keeps the front wheel in motion. A picture of the machine in operation is given above.—New York Journal.

England's First Elevated Railway.

The completion of the first elevated railroad in Liverpool, and in fact in England, is now announced, the line traversing the whole length of the docks of that city, some six miles, with important extensions contemplated. According to the account given of this structure, it consists generally of wrought iron plate girders of fifty feet span, supported on channel iron columns. Some of the spans are 100 feet long and others are so arranged that they can be lifted to afford a passage for specially bulky goods. The columns are bedded in cast iron sockets, with thin cement, or "grout," which are in turn firmly fastened to large masses of concrete. The structure is floored with arched plates two and one-half feet wide and fifteen inches deep, covered with asphalt. The electricity by which the railway is worked is distributed along the line by a steel conductor placed between the rails on porcelain insulators; hinged collectors sliding along this conductor take off the current to the motors, which are attached to each car.

Shrewd Russian Rascal.

There are some shrewd rascals in Russia. The Marquis de Fontenoy says that Prince Dolgorouki on leaving an entertainment at the Winter Palace not long ago found that a sleeve of his fur coat had been cut off in spite of the watchfulness of the attendants. The next day the Prince sent his coat to the furrier with orders to fit a new sleeve in lieu of the one that had been stolen. A couple of hours afterward, and before the tailor had had time to find a new piece of sable sufficiently fine to match the fur of the cloak, a servant dressed in the livery of Prince Dolgorouki entered the store bearing the missing sleeve, stating that the police had just recovered it and that he had been sent by the Prince to have it sewed on quickly, while he waited, as his Highness wished to wear it the same afternoon. Within half an hour the tailor had completed the job and handed the cloak to the footman, who straightway disappeared in the direction of the Dolgorouki Palace. Later in the afternoon the tailor was astonished to see the Prince's valet enter the shop and ask for the master's cloak, and only then realized that the liveried individual who had called upon him in the morning with the missing sleeve was a clever thief who had first stolen the sleeve with the object of being able to subsequently obtain the entire coat, which is valued at $15,000. No trace has yet been found of the missing garment.

"I am convinced of the merit of Hood's Sarsaparilla, after having taken but a few doses"—this is what many people say.

"Mrs. Winslow's Soothing Syrup"

Has been used over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays pain, cures wind colic, regulates the bowels and is the best remedy for diarrhœa, whether arising from teething or other causes. For sale by druggists in every part of the world. Be sure and ask for Mrs. Winslow's Soothing Syrup, 25c a bottle. Jan 27-1yr.

A Cure for Croup.

If your children are subject to croup, always keep a bottle of Chamberlain's Cough Remedy at hand. It is a prompt and certain cure. If given as soon as the croupy cough appears it will prevent the attack. For sale by druggists.

Rheumatism Cured in a Day.

"Mystic Cure" for Rheumatism and Neuralgia radically cures in one to three days. Its action upon the system is remarkable and mysterious. It removes at once the cause and the disease immediately disappears. The first dose greatly benefits. Seventy-five cents. Sold and guaranteed by C. B. Woodworth & Co., Druggists, Fort Wayne, Indiana. dec3-d&w 3 mo

Well Fixed.

Upton—De Curb's failure is a pretty bad one, isn't it?

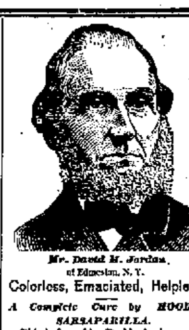

Downton—N—o, not so bad. He's got his winter coal in.

Get something smaller than the ordinary pill. And something that's better. That means Dr. Pierce's Pleasant Pellets—they're the smallest and the best; the easiest to take and the easiest in the way they act.

Wonderful things—these tiny, sugar-coated Pellets. They put an end to Sick and Bilious Headaches, Constipation, Indigestion, Dizziness, Bilious Attacks—all the derangements of liver, stomach and bowels. Mildly and gently, but thoroughly and effectively, they cleanse, renovate and regulate the entire system. One little Pellet for a gentle laxative—three for a cathartic.

They're the best Liver Pill ever made, purely vegetable, perfectly harmless—and the cheapest pill you can buy, for they're guaranteed to give satisfaction or your money is returned. It's a plan peculiar to Dr. Pierce's medicines. You pay only for the good you get.

Mr. David M. Jordan, of Edmeston, N. Y.

7 a. m.	40° above
10 a. m.	42° above
12 m.	45° above
2 p. m.	45° above

The Weather.

WASHINGTON, Feb. 5.—Forecast till 8 p. m., Tuesday—For Indiana: Rain or snow today or tonight; clearing Tuesday forenoon, with a cold wave; brisk northwesterly winds.

FRESH LOCAL LINES.

Miss Kate Beebe is home from New York.

Miss Anna Killen, of East Creighton avenue, is ill.

Major Will Wilson celebrated his thirty-first birthday yesterday.

There will be an old soldiers' ball at Schroeder's hall tomorrow evening.

Frank France, of the Randall, spent Sunday at Decatur, visiting his mother.

Bernhard L. Post will go to Indianapolis this evening to attend a counterfeiting trial.

Scarlet fever is raging near Monroeville. The schools in the infected district are to be closed.

The attraction at the Temple next Thursday night will be "The Ensign," the great naval drama.

Eleven big hungry bums were accommodated with sleeping quarters at the station house last evening.

George Zurbuch, of New Haven, representing a Chicago Oil and Belting company, is in the city today.

Preaching all this week at the Church of Christ, corner of Jefferson and Griffith streets. Come early to get a seat.

August Grobrian, a well known Madison township citizen, will engage in business in this city in the spring.

Fowler & Warmington's comedians, in "Skipped by the Light of the Moon," will be the Temple attraction next Saturday night.

Early yesterday morning the street car employes' union met and installed officers and took in ten new candidates for membership.

Miss Sadie Lochamer, of Edgerton, and Mr. James Lechler, of this city, were married at Monroeville last week by Rev. B. F. Kain.

Last night an electric light lamp on Main street, between Calhoun and Harrison streets, fell to the ground from the weight of snow and ice.

M. N. Webber, Henry Foust and one or two other gentlemen are negotiating for the property on the corner of Main and Calhoun, known as "Loafers' Corner."

Mrs. Peter Perrigney, of Lumbard street, had the misfortune to slip on the ice and fell, breaking her right arm, which will confine her to the house for several weeks.

The executive board of the Trades and Labor council met yesterday afternoon and audited the books of the treasurer for the fiscal year 1892. The accounts were found correct.

C. E. Wallen, formerly a well known Fort Wayne photographer, but who has been living at Selma, Ala., for several years, writes that he will return and again engage in business in this city.

The south half of the basement of the new Fort Wayne club building was intended for a bowling alley, but it has been decided to change the plans and convert this room into a tonsorial parlor, with bath rooms in the rear.

Officer Fred Limecooley a few days ago fell on a slippery pavement, alighting on his head. An icicle penetrated one eye and it is feared he may lose his sight entirely. He also sustained a fracture of the skull near the nose.

C. C. Patterson is in the city making a canvass for the life and public services of James G. Blaine, which is written by James P. Boyd. The work is an excellent one and will be delivered about the 15th of this month.

Col. D. N. Foster left today on the Keystone express for Philadelphia where he will attend the meeting of the away commissioners on the 8th inst. He will go from that city to Washington, D. C., accompanied by Mrs. Foster.

Saturday afternoon a meeting of the Allen county township trustees was held in the commissioners' court room. They discussed petitions which will be presented to the legislature for the passage of certain laws governing trustees.

Three very giddy young men yesterday hired a sleigh of Rippe, the liveryman, and started out to "paint" the town. About 4 o'clock, while racing on Washington street, the horse got frightened and ran away throwing the men out and smashing the sleigh to splinters. The horse was also hurt.

Some young girls have been collecting funds in different parts of the city representing that the same was for the Second Presbyterian church. The authorities of the church wish to give notice that no such persons haveat any time been authorized to collect any money for the church. They should be promptly arrested.

Henry J. Meyer, of St. Louis, is in the city the guest of friends and relatives. Mr. Meyer went from this city to Missouri and shortly after locating in St. Louis was married to Miss Lemp, daughter of the millionaire brewer. Mrs. Meyer applied for a divorce not long since and her husband is now in this city to obtain testimony as to his honorable career while a resident here. This he finds an easy task and will return to his home with abundant complimentary testimonials. He is well known and popular in society circles.

Mrs. Fred Roobke has recovered from a serious illness.

The new city hall will be ready for occupancy about the 1st of April.

There was good skating on the St. Joe river yesterday near the Centlivre brewery.

H. F. Higgins has been appointed as agent at Richmond, Ind., for the Guarantee Investment company.

Mr. and Mrs. Edward M. Wilson, of No. 290 West Berry street, rejoice in the advent of a young son. Mr. Wilson is of the well known firm of Schrader & Wilson.

The Morning Musical concert which was to occur tomorrow evening has been postponed till Friday evening, Feb. 10. This entertainment will be given by home talent, and should have a full house.

The gospel meetings at the Grace Reformed church will continue through this week. Services Tuesday, Wednesday, Thursday and Friday evenings. Persons not having church homes are specially invited to these meetings.

The sermon by Rev. J. S. Ainslie last evening, in the South Congregational church, drew a large audience, notwithstanding the ice and rain. The theme was "The Wise Seekers," and was illustrated by three large paintings, representing the wise men following the star that led them to the Christ. The truth was presented in a most interesting and attractive manner, and held the close attention of the people. At the close of the service ten signed cards committing them to the Christian life.
